THE NATURE SIGNAL — THEME OVERVIEW

The Nature Signal is the ecological vocabulary of the practice. Not nature as metaphor — nature as a literal terrain the practitioner inhabits and reports from. Forest bathing, mycelium networks, watershed dynamics, emergence: the science of living systems, applied to the science of a human life.

The RPG/Arcade/Sci-Fi framing meets its natural counterpart here: the living systems outside the terminal are as complex and gameable as the ones inside it. A forest is a network with more nodes than the internet. Soil is an ecosystem with more organisms per gram than humans on Earth. The mycelium network is an older internet running chemical packets through hyphal threads.

The Nature Signal rewards the practitioner who treats the natural world not as backdrop but as practice space — a co-processor in the project of self-care.

Primary ASCII markers: `■` (undulation / growth wave), `■` (water / flow), `■` (node / organism), `∞` (ecosystem cycles / deep time)

FLAVOR TEXT — THE NATURE SIGNAL

> "In every walk with nature, one receives far more than one seeks." — John Muir.
> The Nature Signal is not a nature walk — it is the archive tracking what the
> practitioner receives from the natural world. The difference between a walk and
> a practice is the record.

> "I went to the woods because I wished to live deliberately." — Henry David
> Thoreau. Deliberately: not automatically, not by habit alone, not on autopilot.
> The practice is deliberate. The check-in is the declaration of intent.

> "In nature's economy, the currency is not money, it is life." — Vandana Shiva.
> The practice's economy runs on the same currency: attention, presence, the
> minutes spent in deliberate engagement. The archive tracks the account.

> "Look deep into nature, and then you will understand everything better."
> — Albert Einstein. The Nature Signal applies this literally: the vocabulary
> of ecology (emergence, mycelium, phenology) is a vocabulary for understanding
> the practice as a living system.

> "The goal of life is to make your heartbeat match the beat of the universe."
> — Joseph Campbell. The phenological record is the heartbeat log. The practice
> is the instrument.
