LOT-01 — OWNER'S MANUAL
================================================================================
DOCUMENT    HW-08 / MANUAL
ISSUE       2026.11.12 · REV A (draft for the 100-unit run)
================================================================================
```

In the box

- LOT-01
- LOT Dock (wireless charger)
- USB-C cable
- This card

The object

One side is mirror steel. The other side has a screen, a small camera and one button: **COPY**.

LOT-01 shows short messages from your LOT account at lot-systems.com: *"Coffee time."* · *"Rain at 16:00."* · *"Evening check-in."* It buzzes twice when one arrives.

First start

1. Put LOT-01 **face-down** on the LOT Dock. Connect the Dock to USB-C power. The screen shows *"Charging."*
2. On lot-systems.com open **Settings → Devices → Add**. You get a 6-digit code.
3. Hold COPY for 10 seconds. The screen shows *"Pair."*
4. On your phone, open the pairing page from the QR on this card. Choose your Wi-Fi, enter the 6-digit code.
5. The screen shows *"Paired."* Done.

Every day

You do	LOT-01 does
Nothing	Checks for messages every few minutes. Buzzes on new.
Press COPY	Sends the message on screen to your **Log** tab. Shows *"Copied to Log."*
Hold COPY (about 1 second)	Same, plus one photo from the camera. Shows *"CAM"* first.
Pick it up	Shows time, temperature, humidity and air quality.

No network? COPY still works. LOT-01 saves up to 20 copies and sends them the next time it is online.

Charging

Face-down on the LOT Dock. A full charge takes about 2 hours and lasts about 3 days. The screen shows the battery level in the corner.

The mirror side does not charge. Only the screen side.

Care

- Wipe the mirror side with a dry microfiber cloth.
- Do not cover the small slot on the bottom edge. That is where the weather sensor breathes.
- Not waterproof. Splashes are fine; do not submerge.

Privacy

The camera takes a photo **only** when you hold COPY, and the screen shows *"CAM"* first. Photos go only to your own LOT account. To remove the device: **Settings → Devices → Remove**, then hold COPY 10 seconds to erase it.

Reset

Hold COPY 10 seconds → *"Reset."* → the device forgets Wi-Fi and account.

Specifications

Size	**40 × 40 × 5 mm (target)**
Body	316L stainless steel, two parts
Screen	1.28" memory LCD, 128 × 128
Sensors	Temperature, humidity, pressure, air quality, motion
