THE TERMINAL KINGDOM — THEME OVERVIEW

The Terminal Kingdom maps the vocabulary of RPG/dungeon/arcade culture onto the practice of self-care. Every serious practitioner of any discipline knows these patterns: the respawn when you fail, the checkpoint when you need to save your progress, the dungeon run that demands sustained effort, the boss battle that mirrors your deepest resistance.

The language of games is not frivolous. It is a vocabulary for growth under pressure — one that millions of people already speak fluently. The Terminal Kingdom makes that vocabulary explicit: the dungeon is the practice, the XP is real, and the boss you face is always some version of yourself.

The three secret bosses — Zelda, Konami, Mordor — are not random. They are:

- Zelda Signal: the first NPC who ever offered help
- Konami Code: the hidden room behind the hidden door
- Mordor Path: the journey that cannot be shortcut

These are the three shapes that all difficult practices take.

FLAVOR TEXT — THE TERMINAL KINGDOM

> "The dungeon is not a place. It is a willingness to go deeper than is comfortable.
> Every check-in is a floor. Every journal entry is a room cleared. The boss at the
> bottom is always some version of yourself."

> "Respawn. The most important mechanic in any game is not the first life — it is
> the second. And the third. The practice is not about not falling. It is about
> pressing continue."

> "Level up does not mean the game gets easier. It means you get more capable.
> The difficulty scales. The growth scales faster."

> "It is dangerous to go alone. Take this. — the first NPC who ever helped you.

> The whole genre of quests begins with someone handing you a tool and saying:
> you are not alone in this. The sword is the practice."
> "One does not simply walk into Mordor. And yet — every impossible journey
> is completed one step at a time. The Fellowship did not fly. They walked.
> Then they kept walking."
> "The checkpoint is not the destination. It is the record that you were here.
> Every journal entry is a save point. Every check-in is a flag planted."
> "Alan Turing, born June 23, 1912. He imagined that machines could think.
> Every device you use to practice self-care runs on that imagination.
> The terminal kingdom is built on what he dreamed."

DESIGN DECISIONS

Decision	Rationale
`guild_signal` avoids `party` ambiguity	"party" appears in too many non-RPG contexts; guild+fellowship are unambiguous
`tavern_rest` omits bare "inn"	"inn" too common; "tavern" or "resting place" = clear RPG vocabulary
`dungeon_run` at 21 days	3×7 — triple the week. The number carries weight without being too rare
`respawn_return` at 14 days	Shorter than `ghost_protocol` (7d gap + return) — the game uses the word
`turing_day` at EPIC	Turing is not a game character, he is the architect of all games
`dungeon_day` Jan 26	D&D booklet published January 26, 1974 — the opening of the dungeon
`mordor_path` at MYTHIC	The hardest badge — requires knowing the exact phrase
`dungeon_elder` at 1,000 days	The first four-digit milestone — a true endgame achievement
`tome_complete` at 200k words	A published novel is ~80k; 200k is two novels and a half
