

LOT Pager User Manual

LOT® Pager — User Manual

Draft for prototype units. Subject to change before production.

What it is

A small stainless-steel square that receives notifications from lot-systems.com, and sends a signal back when you press its button.

Controls

Control	Action
Short press	Copy — marks the notification and writes it to your Log tab
Long press (2 s)	Acknowledge / dismiss
Hold 10 s	Pairing mode

Setup

1. Place the Pager on a Qi charging pad until the screen lights.
2. On lot-systems.com open Settings → Add Pager. A 6-character code appears.
3. Hold the button for 10 seconds. Choose your Wi-Fi and enter the code on the Pager.
4. The screen says “Paired.”

Daily use

Notifications appear on the screen with a short buzz. Press to Copy or hold to dismiss. Idle screen shows time and room conditions.

Charging

Place the polished side down on any Qi pad. Charge time about 1.5 hours.

Camera

The camera captures only when you approve on the device. The screen shows an indicator while it is active.

Care and safety

Do not open the case. Do not use above 40 °C. Contains a lithium battery.

Troubleshooting

Symptom	Fix
No notifications	Check Wi-Fi; re-pair

Symptom	Fix
Won't charge	Center on pad; remove metal objects
