THE DUNGEON MASTER — THEME OVERVIEW

Tabletop role-playing games invented the vocabulary of the modern self: hit points, experience points, level-ups, skill trees, save points. Every RPG mechanic is a metaphor the body already knows — health depletes, rest restores, practice advances the character. The Dungeon Master expansion brings the tabletop RPG lexicon into the self-care terminal.

If you write "level up" in your journal, the system knows you mean it. If you hit a "save point," that IS a save point. The Dungeon Master is the one who tracks the campaign. You are your own DM.

EASTER EGGS – WORD TURN MOMENTS

<pre>> SAVE POINT REACHED < ■.■.■</pre>	Your journal entry is a save point. The game continues from here. Progress: PRESERVED
<pre>> XP GAINED < ■→●</pre>	LEVEL UP detected. Experience is not metaphor — it is the mechanism. You are a higher-level version of yourself. STAT INCREASE: +1 to everything that matters.

> DUNGEON CLEARED < ■.■	The dungeon was the day. The rooms were the hard parts. You walked through. The dungeon is cleared.
> HEALTH RESTORED < ♥.●	HP: LOW → FULL The mechanic is simple: rest, eat, drink, connect. You found a health potion. You used it. That is the whole game.

FLAVOR TEXT — THE DUNGEON MASTER

"The purpose of the dungeon is not the treasure. The dungeon is the teacher. The treasure is what you bring back." — riff on Gary Gygax, 1974. Every journal entry is a dungeon room. Some rooms are empty. Some have monsters. Some have exactly what you needed.

"In every campaign, the dungeon master builds the world — but the characters decide what it means." — tabletop RPG doctrine. You are both the DM and the character. The world is generated as you walk through it.

"We are all roleplaying something. The question is whether you wrote your own character sheet." — LOT Systems doctrine. The skill tree is real. The stat increases are real. The level-ups are earned over sessions, not handed out.

"Natural 20. You didn't expect that." — D&D; table, 1974. The practice creates the conditions for natural 20s. You cannot force them. You can only keep rolling.

"Alan Turing imagined a game where a machine passes for human. What he didn't finish imagining: a human passes for machine — and then passes back. The journal is the return." — riff on the Turing Test, 1950.
