[13] DESIGN PHILOSOPHY — THE RPG ARCADE OF SELF-CARE

Why LOT is built as a game

THE CORE LOOP

```
+++[ CHECK IN ]--+ +-[ ANSWER ]--+ +-[ EARN ]--+ | Daily signal | -> | Memory Q | -> | Badge | | Emotional | | Journal |
| XP | | state | | entry | | Level | +-----+ +-----+ +-----+
```

BADGE PHILOSOPHY

Badges are NOT gamification tricks. They are signals from the system back to you: "I noticed that." Every badge is a reflection, not a reward. The rarest badges require the deepest care — Mythic badges acknowledge things only a truly self-aware person would say or do.

WORD TURNS

When the right word appears in your memory answer, the system responds with a terminal message. This is the RPG "response event" — the dungeon acknowledges what you brought into it. Writing "breathe" or "ouroboros" or "seldon" are all valid moves.

DUAL THEMES

WATER: growth is fluid, like a droplet becoming a current.

ARCHITECTURE: growth is structural, like laying a foundation.

Both paths reach the same milestones — choose your metaphor.

THE SECRET BOSS SYSTEM

Secret boss badges are hidden until unlocked. They reward:

- Writing specific literary references (Asimov, Le Guin, Gibson)
- Discovering special dates (Towel Day, Gagarin Day, Ada Protocol)
- Using rare phrases ("pale blue dot", "one ring to rule", "prima materia")
- Arriving at exactly the right time (01:23, 13:37, 03:14)

The badge universe is designed as a Sci-Fi book + Arcade cabinet.
