LOT-P1 ﷺ README

LOT COMPUTER — HARDWARE PROGRAM (“LOT PUCK”)

Codename **LOT-P1** · a 40 × 40 × 5 mm stainless-steel pager-computer wired to lot-systems.com. Owner: Vadik Marmeladov (S-2, Inventor, COSMO® CIA) · Status: **Phase 0 — Plan (2026-11-07)**

#	Document	Content
00	PLAN	Concept, 19-point requirement traceability, engineering verdict, open conflicts
01	BOM	Component buying list with links, 1-unit and 100-unit cost
02	MECHANICAL	2-part 316L body, 5 mm stack budget, finish, wireless-charging window
03	FIRMWARE	Firmware architecture, states, power, OTA
04	SOFTWARE-API	LOT API connector, device protocol, Log-tab “Copy” signal, host software
05	MANUFACTURING	PCBWay flow, 100-unit run, QA, cost
06	ROADMAP	Phased roadmap, risks, decisions needed
—	SESSION-DIGEST	Compressed state carried between sessions
—	`pdf/`	PDF manuals generated from the above (`build-pdf.sh`)

Session report: `docs/LOT-SR-20261107-01.md`.

> **Not verified this session:** lot-systems.com, brand.lot-systems.com and institute.lot-systems.com were unreachable from the sandbox (host not in network allow-list). Brand/CQGS reading is deferred — see ROADMAP §Decisions. All prices/links are planning estimates; confirm before ordering.
