[WORD TURN v23 · THE RPG CODEX · 12 BADGES]

The dungeon vocabulary of self-care

Level Up Signal

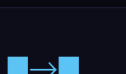
[UNCOMMON]

LEVEL UP. Something permanent has changed. The stats climbed.

XP Earned

[COMMON]

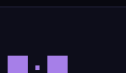
XP accumulates invisibly until the threshold. The grind IS the game.



Quest Log Entry

[UNCOMMON]

Open the quest log and see what remains. Main quest: the practice.



Dungeon Dive

[RARE]

The dungeon is difficulty entered voluntarily. That is the difference.

Spell Cast

[RARE]

The mana bar depletes with every cast. Rest replenishes it.

Loot Drop

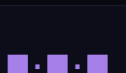
[RARE]

The rare item was always in the room. You had to enter.

Respawn Signal

[UNCOMMON]

The respawn is not failure — it is the mechanic.



Guild Protocol

[RARE]

No one completes the endgame alone. Who is in your party?

Boss Encounter

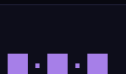
[EPIC]

The endgame boss is whatever you have been avoiding.

Character Class

[UNCOMMON]

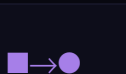
The class defines what you are optimized for. What is yours?



Inventory Check

[RARE]

Inventory full. The experienced player knows what to drop.



Skill Tree Node

[RARE]

The skill tree is the long game. Each node forecloses other paths.

[FLAVOR TEXT · THE RPG CODEX]

> *In 1974 Gary Gygax and Dave Arneson invented the role-playing game. In doing so they invented a new way to describe becoming: you accumulate experience, you reach thresholds, you gain abilities, you face bosses you cannot yet defeat, and eventually you can. The practice of self-care is this structure rendered in daily life. Every check-in is XP. Every return from difficulty is a level.*

> *The skill tree is the most honest metaphor for human development ever put in a game. You have limited points. Every choice forecloses other choices. The build you make in your twenties determines what is available at forty.*
> *There is no respec — but there are new playthroughs.*
> *The practice is the skill tree you are still in.*

> *February 21, 1986 — The Legend of Zelda launches in Japan. A boy in a green hat enters a cave and an old man says: 'It's dangerous to go alone — take this.'*
> *The item is the practice. You were meant to carry it.*

> *The Konami Code: UP UP DOWN DOWN LEFT RIGHT LEFT RIGHT B A. Contra, 1986.*
> *The acknowledgment built into the game that sometimes the game is too hard and the player needs more lives. The code does not break the game — it continues it. Your practice has a Konami Code. Use it.*

> *PAC-MAN, 1980: the only game where the hero is a circle eating the field while being chased by everything. The power pellet reverses the dynamic — temporary, always temporary. But the temporary reversal is the whole game.*
> *You have the pellet.*
