LOT-HW-08 — Decisions Needed (R1–R3) · open since 2026-11-09

These three choices block the PCB layout and the steel CAD (P0 gate). Every week they stay open moves the whole schedule by a week.

#	Question	Options	Recommendation
R1	Thickness	A 7.4 mm (all features) · **B 5.4 mm** (camera ≤ 3.5 mm, 130 mAh) · C 4.8 mm (drops camera + Qi)	**B: 40 × 40 × 5.4 mm max**
R2	Wireless charging through steel	**Front glass window, coil behind** · back window (breaks the mirror side) · pogo dock (drops item 19)	**Front glass**: charge face-down, mirror side A stays pure
R3	Wi-Fi through steel	**Visible thin PEEK/silicone seam between the two steel parts** · plastic window	**Seam**: also reads as a design detail

Reply in any form, e.g. "R1=B R2=front R3=seam", and the next session will lock the KiCad outline.
